## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election with traverse of Group I in the reply filed on June 15, 2004 is acknowledged. The traversal is on the ground(s) that the groups are sufficiently. This is not found persuasive because Group I pertains to method of calibration and Group II pertains to projection apparatus, and separate searches are required.

The requirement is still deemed proper and is therefore made FINAL.

This application contains claims 11-15 drawn to an invention nonelected with traverse in the reply filed on June 15, 2004. A complete reply to the final rejection must include cancelation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

### ***Allowable Subject Matter***

Claims 1-10 are allowed.

None of the prior art of record teaches or discloses a method of calibrating a projection apparatus comprising generating a first height map at a measurement station and a second height map at an exposure station and comparing the two height maps to calibrate the position detection systems.

### ***Conclusion***

This application is in condition for allowance except for the following formal matters:  
(see above *Election/Restrictions* section).

Prosecution on the merits is closed in accordance with the practice under *Ex parte* Quayle, 1935 C.D. 11, 453 O.G. 213.
